Compound Microscopes

3025 Microscope Series - A clinical microscope for microbiology, pathology, cytology and fluorescence applications. Multi-viewing systems are also available.

3012 Microscope Series - A clinical level microscope for routine applications in medical, veterinary and university labs.

3000-LED Microscope Series - Outstanding optics, ergonomic design and renowned durability make the 3000-LED Series an excellent choice for clinical labs in universities, medical and veterinary offices.

3002 Microscope Series - An affordable choice for routine lab applications in medical, veterinary and educational environments.

3002-CB Forensic Comparison Microscope - An entry level Forensic Comparison Microscope for teaching forensics and comparative sciences. The 3002-CB allows you to compare two slides viewed side by side with the ability to view each separately, in a full field or separately.
